*We care
to make the
difference*

Leadership in times of austerity

When the going gets tough get
closer to service users ,staff and
partners

*We care
to make the
difference*

Co-production ,CO-production
Co-production

Integration ,integration ,integration

*We care
to make the
difference*

Leadership in Austerity

- The NHS is facing its most difficult financial challenge since its inception .
- There is general agreement that there will be a 30 billion short by about 2020
- Mental health services disproportionately hit 2% disinvestment over last two years with differential deflators applied which favour physical health providers

Leadership in Austerity

- Recessions are not good for any Nations mental health-so increased demand made worse by demographics changes
- In the English NHS one could argue this has been compounded by significant structural change

Leadership in Austerity

- North West London is a whole system integration pilot sight—involving Commissioners ,Local Government ,providers ,local people ,service users primary care NGOs.
- Centre of approach is co-production based on conversations about different ways of developing outcomes (with less resource)

Leadership in Austerity

- Services coming together based on what is needed by the individual not the available organisations .
- Early adopters are focusing on Long term conditions and serious mental illness ,cancer ,dementia-primary care providers ,acute care provider's , Mental health provider's service users
- Looking at new ways of working together ,new ways of contracting new ways of funding

Leadership in Austerity

- System leaders-being able to focus beyond your organisation's boundaries
- Clinically lead pathways
- Difficult conversations with local people/service users about what they want and how they want it delivered

Never let a good crisis pass you by

*We care
to make the
difference*
