

International Initiative for Mental Health Leadership and International Initiative for Disability Leadership

IIMHL/IIDL 2019 Washington DC Leadership Exchange
Draft Program for Network Meeting
“Leading the Way Forward; Access, Accountability and Action”
 As of March 1, 2019

About the 2019 Theme:
“Leading the Way Forward: Access, Accountability and Action”

Each of the words in the theme is meaningful in the both the US context as well as in the broader international context.

- *Leading the Way Forward* was chosen to reflect the horizontal work being undertaken in the US by the Interdepartmental Serious Mental Illness Coordinating Committee (ISMICC) established in 2017 in accordance with the 21st Century Cures Act. The first ISMICC report to Congress in December 2017 was titled: *The Way Forward: Federal Action for a System That Works for All People Living With Serious Mental Illness and Serious Emotional Disturbance and Their Families and Caregivers*.
- The theme also resonates strongly with international developments in the disability sector around access and social inclusion as well as the increased focus on individualised funding and personalised support.
- With the IIMHL/IIDL joint focus on leadership, we adopted the theme: *“Leading the Way Forward”*.

Many Match topics and the current international dialogue fit within at least one of the three sub-themes:

- *Access* is about ensuring availability of high quality supports and services and a focus on people with lived experience of mental health distress and disability
- *Accountability* addresses systems and supports to ensure effectiveness and outcomes for people, families and communities
- *Action* speaks to engaging all partners in all sectors and across the lifespan, in enacting meaningful change in supporting healthy people in healthy and inclusive environments.
